Start planning your family cruises, by defining your budget. Once you know your budget look for cruises that fit into your budget. After short listing, the cruises look for the facilities and services they are offering along with the nature and types of activities suitable for children. You of course want them to enjoy the cruise so there should be sufficient provision to keep them happily occupied. If you have very young children, make sure cribs and babysitting facilities are available. While for a bit older children loads of activities like dancing classes, escorted tours, parties, games and contests are planned. Every cruise has its own bag of goodies for children. Keep your children's age in mind when you re going through these activities.

Some family cruises do not allow infants or pregnant women onboard. Check at the time of booking whether infant care and baby-sitting facilities are available or not. Keep ample stock of the things your baby might need like baby food, diapers, as you might not find them onboard.
